

MOLD FACT SHEET

WHAT CAN YOU DO?

- Immediately report plumbing or other water leaks, HVAC problems, high humidity or condensation issues by submitting a [School Dude](#) work order.
- Clean up spills of food or drink immediately.
- Remove trash and food containers from work area regularly.
- Do not block wall heating and cooling units with items that impede the air flow.

Submit an EHS Hazard and Incident Report Form to request a visual growth assessment if any of the following conditions exist:

- Visible growth inside.
- Consistent moldy or musty smells within a building.
- Known episodes of major leaks or flooding.

→ **MOLD** is a common term used to refer to fungal growth.

→ **MOLD** can be found on almost any organic substance as long as water and oxygen are present.

→ **MOLD** spores are naturally occurring and can never be prevented completely from finding a place to grow.

→ **MOLD** exposure does not always present a health problem but sensitive persons can experience allergic reactions.

No EPA or other federal limits have been set for mold or mold spores.

Review the [NCCU Mold Management Plan](#) for full details about reporting and remediation.
