

Undergraduate Internship and Research Opportunities

North Carolina Central University and Duke Medical Systems

Clinical Health Summer Program (CHSP) - The Clinical Health Summer (CHSP) program is collaboration with Duke Medical Systems and other agencies. The seven-week summer program is an experiential learning opportunity held each year is for underrepresented minority and disadvantages students accepted to a health science or health related field at North Carolina Central University (NCCU). The program is designed to provide students with experience in a health delivery system based on their current medical or health focus. It is an educational work learning experience in which students are placed in a 40-hour per week position directly under the supervision of health and medical professionals. Health science seminars and workshops are conducted providing an opportunity to network and interact with a variety of health care professionals. The program pays a stipend. *Contact Health Professions Career Center for additional information 919-530 -7128.*
