## ABOUT

# North Carolina Central University School of Law

North Carolina Central University School of Law was founded to provide opportunities for African Americans to become lawyers.

Our mission is to provide high-quality personalized, practice-oriented, and affordable legal education to historically underrepresented students from diverse backgrounds to help diversify the legal profession.

NCCU School of Law empowers its graduates to become highly competent and socially responsible lawyers and leaders committed to public service and meeting the needs of underserved communities.

In fulfilling its mission, NCCU School of Law will help to create a more just society.

## ABOUT

# NCCU Technology Law & Policy Center

The mission of the NCCU Technology Law & Policy Center (TLPC) is to **(1)** produce technology-conscious lawyers who will use technology to facilitate the efficient, effective, and ethical practice of law and increase access of legal information and services to underserved communities; **(2)** produce diverse technology law experts to serve the changing needs of those seeking legal advice and representation; and **(3)** facilitate engagement in meaningful technology-related policy discussions to ensure that technology law, regulations, and implementation are used to create a more just society.

The creation of the TLPC was made possible through a generous grant from Intel Corporation. Intel is the Presenting Sponsor for the 2024 Law & Technology Symposium & Summit.

## Law & Technology Certificate Program

NCCU School of Law is committed to preparing students for the increasing technology-driven legal industry and, in support of that goal, has established the NCCU School of Law & Technology Certificate Program. The Law & Technology Certificate recognizes a student's successful completion of a focused course of technology and law study.

Students who earn this Certificate will have completed classes and assignments that will ensure that the student has **(1)** studied a broad range of law of technology and technology law subjects, **(2)** engaged in an in-depth study in one or more technology law subjects, and **(3)** developed competence in the area of law practice technology.

## The Evolving Landscape of Employment Law in the Era of Artificial Intelligence

The symposium on The Evolving Landscape of Employment Law in the Era of Artificial Intelligence offers an in-depth look at how AI is transforming the world of work and the legal frameworks that govern it.

This event is designed to address the critical legal, ethical, and regulatory challenges that arise as artificial intelligence becomes increasingly embedded in employment practices.

While employers have at their disposal many applications and automated solutions to help them with making employment decisions such as hiring, firing, promotion or discipline; using these applications and automated solutions does not shield employers from potential violations of employment discrimination laws, such as Title VII of the Civil Rights Act of 1964, American with Disabilities Act, the Age Discrimination in Employment Act.

Attendees will explore the rapidly changing patchwork of federal, state, and local laws regulating AI in hiring, promotion, and workplace management.

The symposium will focus on the legal risks and compliance obligations associated with AI-driven employment decisions, including the growing requirements for bias audits, impact assessments, and transparency in automated decision-making systems. Special attention will be given to how these developments affect both employers and employees, with an emphasis on preventing discrimination, protecting privacy, and ensuring fairness for all workers.

The symposium will bring together legal scholars, policymakers, and labor advocates and will underscore the importance of equity, transparency, and accountability in the deployment of AI in employment. Our goal is to inform best practices and policy recommendations that advance justice and inclusion as AI continues to reshape the workplace.

Join us as a sponsor for an event dedicated to navigating the evolving legal landscape of AI in employment, and to building a future where technological innovation and legal protections advance together for the benefit of all.

## Law & Technology Summit

The annual Law & Technology Summit, started in October 2022, is a gathering of thought leaders at the intersection of law and technology. The Summit brings together distinguished legal scholars, legal practitioners, digital rights advocates, and policy makers. These experts come together to discuss and dissect pressing

topics such as AI and ethics, data privacy, cybersecurity, intellectual property rights in the digital age, and much more.

The Summit also provides an opportunity for law students to engage directly with these thought leaders and to gain a better understanding of the legal and societal implications of the changing technological landscape.

The summit features keynote speakers, panel discussions, and networking opportunities for attendees to learn from and connect with each other.

The summit is organized by the North Carolina Central University School of Law, a leading institution in legal education, with a focus on social justice, public service, and diversity. The summit aims to foster dialogue and collaboration among the legal community and the technology sector, as well as to promote innovation and excellence in the practice and study of law and technology.
